

I am opposed to the proposed idea of further FCC deregulations in regard to ownership limitations. We are getting further away from the idea of community in so many facets of our culture already (ie. conglomerate companies edging out small businesses that support a particular community), please do not let radio follow suit. We NEED diversity in radio, as much as we do in other forms of business. Please consider keeping restrictions on numbers of stations and publications to help our communities alive and well. Thank you
